PROFESSIONAL SUMMARY

Computer Science graduate from Saarland University with hands-on experience in backend development, systems programming, and DevOps automation. Proficient in Java, Python, C++, and Linux environments, with practical background in IAM workflow automation at ODDO BHF and open-source backend development at Minervis GmbH. Looking to contribute solid software engineering skills to SDE and DevOps roles.

EDUCATION

B.Sc. in Computer Science *Oct 2022 – Jan 2026*
Saarland University, Germany

- Key Coursework: Distributed Systems, Concurrent Programming, Compiler Construction, Operating Systems, AI and Machine Learning.
- Thesis: "PDA Augmented LLMs Decoder" – Integrating Automata Theory with LLMs for reliable code generation (grade: 1.3).

Undergraduate Studies in Electrical & Electronic Engineering *Aug 2021 – Jul 2022*
University of Khartoum, Sudan

- Coursework in digital logic, circuit theory, and engineering mathematics.

WORK EXPERIENCE

ODDO BHF *January 2025 – Present*
IAM DevOps (Part-time)

- Orchestrate secure identity lifecycle management for a leading Franco-German financial group.
- Implement Least-Privilege Principles and automate identity workflows to mitigate cybersecurity risks.
- Ensure compliance with strict financial regulations through rigorous system auditing and IAM infrastructure hardening.

Minervis GmbH *September 2023 – August 2024*
Software Engineer

- Developed and maintained the open source Learning Management System (ILIAS).
- Refactored legacy backend modules and contributed to bug-fixing.
- Contributed to the development of third-party plugins for the system.

Xenon *November 2020 – August 2023*
Co-Founder & Software Engineer

- Co-founded a software startup focused on delivering web applications for customers.

PROJECTS

PDA AUGMENTED LLMS DECODER (BSC RESEARCH)
Technologies: Python, NLP, Theoretical Computer Science

- Designed a framework combining context-free grammar constraints (PDAs) with LLMs to eliminate syntax errors in AI-generated code.

CONCURRENT DISTRIBUTED TICKETING SYSTEM
Technologies: Java, Concurrent programming

- Built a thread-safe distributed platform to manage real-time requests, ensuring zero race conditions and high availability.

C-COMPILER & BYTECODE INTERPRETER
Technologies: C, Compilers, Systems Programming

- Developed an end-to-end compiler implementation covering lexical analysis, parsing, symbol resolution, and code generation.

SKILLS

Programming Languages:	Java, Python, C++, C, SQL, Bash, JavaScript, TypeScript
Systems & Tools:	Linux (Debian, Ubuntu), Docker, Git, GitLab CI/CD, REST APIs
Engineering Practices:	Distributed Systems, Concurrency, Object-Oriented Design, Unit Testing
Languages Spoken:	English (C2 – Fluent), German (B2 – Upper Intermediate), Arabic (Native)
